## Vorwort

Diese ONR wurde vom Komitee 076 „Waffentechnik und Schießwesen“ erstellt. Sie berücksichtigt die neuen Beschlüsse der Ständigen Internationalen Kommission für die Prüfung von Handfeuerwaffen C.I.P. (Commission Internationale Permanente pour l'épreuve des armes à feu portatives).

Die vorliegende Ausgabe ersetzt die Ausgabe ONR 191392-1:2002 und ONR 191392-2:2002, die technisch überarbeitet wurde. Die wesentlichen Änderungen beziehen sich auf die Änderung des Beschussgasdruckes und die Erweiterung um neue Kaliber.

Seitens des Bundesministeriums für Wirtschaft, Familie und Jugend liegt dem Austrian Standards Institute die Zustimmung (Geschäftszahl: BMWFJ-91.081/0020-I/10/2011) zur Vervielfältigung der C.I.P.-Daten für die vorliegende ONR vor.

Die ONR 191392 „Büchsenpatronen ohne Rand – Abmessungen und Gasdrücke“ besteht aus folgenden Teilen:

Teil 1: Metrische Kaliber

Teil 2: Kaliber in Zoll

## 1 Anwendungsbereich

Diese ONR legt die Größtmaße für Patronen und die Kleinstmaße für Patronenlager sowie den maximal zulässigen Gasdruck beziehungsweise die maximal zulässige Energie der Patronen fest, welche bei der Produktion von Waffen und Munition einzuhalten sind. Die Einhaltung dieser Werte wird im Zuge der Patronenprüfung und der Beschussprüfung der Waffen kontrolliert.
